EASY CLEAN OUT BIN

Gone are the days when rain and moisture would turn your clean out area into a concrete mess, quickly rusting out the inside of your truck body. All debris gets blown into a simple plastic drum. This means no more trips to the dump as the debris can simply be removed with a garbage bag.

SINGLE BAG DOOR

The Bag door is located on one side of the truck allowing space for a dedicated ladder rack. No more moving your ladder each time you have to open the bag door. Heavy duty gas shocks are also installed for easy opening and closing.

SAFETY CATWALK

A must have feature making it safer to walk on the roof, especially when it's raining or snowing.

INDEPENDENT COMPRESSOR

37.8 CFM 20HP Honda Engine. With that kind of CFM, you will get the job done with time to spare. The compressor is independent from the vac. You no longer have to start your vac system when all you need is air pressure. Perfect for doing jobs like dryer vent cleaning, blowing out HVAC units, etc.

MORE STORAGE

Holds all your important tools and supplies, helping you become more efficient and increase sales. You can even take a portable duct vacuum with you and have the best of both worlds.

MASSIVE HOSE AREA

Easily hold 150-200 ft of vacuum hose.

ALUMINUM CONSTRUCTION

Built using the exact same methods as airplanes and firetrucks. The H1 body is ultra rugged while at the same time lightweight. This delivers cost savings in terms of lower fuels bills and less wear and tear on the trucks chassis, brakes, transmission etc.

NO MORE PTO

Suction comes from our new HAVAC vac system. A gas engine drives the suction. No more belts or pulleys: only one moving part. Suction is comparable to any competing truck on the market.

THE HAVAC
